

ABSTRACT OF THE DISCLOSURE**METHOD AND APPARATUS FOR PRINTING DOCUMENTS USING A
DOCUMENT REPOSITORY IN A DISTRIBUTED DATA PROCESSING
SYSTEM**

- 5 A method, apparatus, and computer instructions for
managing a document. A request is received from a user at
a remote data processing system to save a document for
printing in which the request includes the document. The
document is then stored in a repository in association
10 with the user in response to receiving the request to
form a stored document. The stored document is sent to a
printer in response to a signal.
